

Formulated by SEMCO, specifically for the HVAC industry, AVRON46® greatly reduces the growth and spread of most bacteria and mold.

ANTIMICROBIAL COATING **AVRON46**

Product Application

Typical application is for the interior surface of HVAC products, best applied on finished products including:

- Ductwork: all round, oval, single and dual wall products
- Acoustical panels
- Sound attenuators

More AVRON46® Benefits

- Available in sheet form for other HVAC products
- Exterior applications available upon request
- Field applied air dry formula

An innovative coating containing an industry leading anti-fungal agent to control and inhibit mold growth.

Clean air is not a luxury, it is an expectation. Mold in the HVAC system could be a significant threat to the air quality of a building and to the health of its occupants.

AVRON46® is an antimicrobial coating formulated by SEMCO, specifically for the HVAC industry, to greatly reduce the growth and spread of most bacteria and mold.

Specify AVRON46® for all of your HVAC air duct system products. This product is especially critical to achieve the high-quality air required in classrooms, laboratories, nursing homes, and hospitals.
