

QUIET

PROVEN

CUSTOMIZABLE

SILENT AIR

SOUND SOLUTIONS

KEY BENEFITS

- Acoustic Fiberglass Fill
- Excellent Attenuation Across All Octave Bands
- Independent Test Data
- Manufactured to Exacting Dimensions
- Minimal Pressure Drop
- Models Designed for low Frequency Octave Bands

APPLICATIONS

- Commercial & Industrial HVAC
- Custom Air Handling Units
- Generator Enclosures
- Exhaust Stacks
- Manufacturing Equipment

A perfect match for both acoustical and air flow performance requirements.

Noise produced by an HVAC system can lead to complaints from building owners & occupants. Eliminate the complaints by including duct, plenum and fan silencers on your next project design.

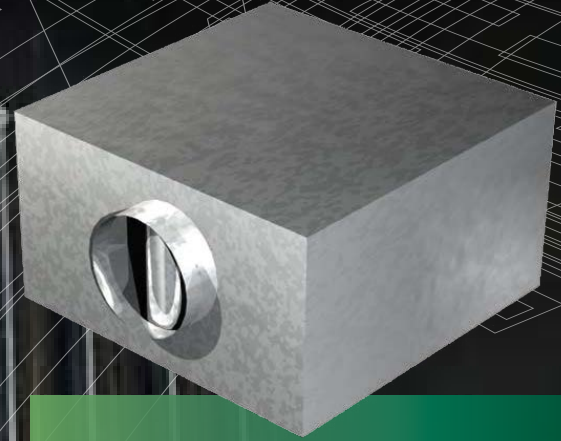

Engineered to fit your application, our silencers are designed to reduce noise in specific octave bands or across a wide range of noise levels. Available in round, rectangular, elbow, or return grille designs, they are the perfect solution for all of your noise pollution problems.

The Silent Air sound solutions include a wide-range of acoustic silencers engineered and independently tested for top quality and performance. Silencers come in a wide range of performances and materials, and are available for either exterior or interior applications.

Certified by an independent testing laboratory

UNIQUE ADVANTAGES

For applications requiring contaminant-free environments such as hospitals, electronics, pharmaceuticals and clean rooms, our full line of Media Free Silencers will enable you to design systems that are not only quiet, but free of glass fiber erosion typically associated with standard sound attenuating products.

EXPERIENCE & EXPERTISE

With over a half-century of innovation and expertise to share with our customers, SEMCO is a global leader in air management. With market presence in 65 countries, we are in a unique position to be a local supplier and an international partner in our customers' projects. Our constant aim is to provide systems that precisely deliver the best indoor air quality and performance, while maximizing energy efficiency.

We offer a complete line of sound attenuating products, including rectangular & round silencers, Media Free silencers, custom silencers, and acoustic enclosure panels designed to eliminate your HVAC noise problems. Whether your project requires a custom solution or an off the shelf selection, our years of HVAC experience will provide the best "Sound Solutions" possible.

Based on our e³ concept, we provide innovative and sustainable products to help you achieve or surpass your environmental targets while optimizing your investment and Life Cycle Cost.

TYPICAL APPLICATION EXAMPLES

- Commercial & Industrial HVAC, Custom Air Handling
- Units, Generator Enclosures, Exhaust Stacks
- Manufacturing Equipment

MATERIALS AVAILABLE

- Aluminium
- Galvanized Steel
- Stainless Steel
- Powder Coated

SIZES AVAILABLE

- 3' to 10' standard lengths
- 12" to 48" standard heights and width combinations
- 12" to 60" standard round sizes
- Custom sizes available

OPTIONS AVAILABLE

- AVRON46 Antimicrobial Coating
- Mylar, Tedlar, Vinyl & Fiberglass cloth wraps
- Acoustic stand-off
- Flanged Connectors
